## Profile

---

I work with frontend technologies and have in-depth knowledge of tools like React, Redux, Zustand, Vue, and Vuetify. I have experience developing user-friendly interfaces and working on the backend with Node.js. I always write my code following clean code principles and strive to deliver projects to pixel-perfect standards. With my passion for new technologies and constant eagerness to learn, I can bring your projects to life with the highest quality.

## Professional Experience

---

**2024/06 - 2024/09**

İzmir,  
Urla Technopark

### BeforeSunset AI

#### Software Developer Intern

- BeforeSunset AI is a project that uses artificial intelligence to help users better plan their time
- In this project, we develop solutions using React, Next.js, Zustand, and Supabase.

**2024/09 - Present**

#### Frontend Developer

**2024/03 - 2024/06**

İzmir,  
Menemen ITOB

### Software Developer (Part-time)

#### GEMAS Pool Technology

- Gemas is a company that produces pool technologies.
- In this project, I was involved in creating an e-commerce site using PHP Laravel.
- I developed the frontend of the website and wrote the backend code for the admin panel.

**2023/05 - 2024/02**

İzmir,  
Urla Technopark

### Associate Frontend Developer

#### Decktopus AI

- Decktopus AI is a project that allows users to create presentations quickly using artificial intelligence.
- In this project, I handled feature and bugfix tasks in the frontend using technologies like Vue, Vuetify, GraphQL, and Hasura.
- I created an admin panel for managing customer services.
- I redesigned the signup and login pages.
- I created a channel to manage bugfixes, which helped us take action quickly.
- I facilitated the integration of Google Analytics into the code.

**2022/10 - 2023/05**

İzmir,  
Urla Technopark

**Software Developer Intern**

**Decktopus AI**

- Decktopus AI is a startup project that allows users to quickly create presentations using artificial intelligence.
- I completed my internship here and during my internship, I took on tasks in frontend development, data analysis, and software testing.
- I wrote the code using TypeScript.
- For data analysis, I used Python technologies such as NumPy, Matplotlib, and Pandas.
- I was involved in creating the templates used by users and transitioned them through test, staging, and production environments.
